AcneStar® Progress Update!

Brief Résumé !

AcneStar® is a unique chemical and drug-free appliance to treat acne and related skin conditions. It is an extremely lightweight, hand-held unit, easy to use and clinically proven to give results.

Now for the Technical Part! How does it actually work?

AcneStar® employs light emitting diodes (LED's) to produce blue light. The blue light lies in the visible part of the electromagnetic spectrum. It is the blue light at a specific wavelength that destroys the bacteria which are the fundamental cause of the development of acne. This then calms the inflammation and ultimately leaves blemish-free skin!

Where are we based?

We are a South Wales based company operating globally.

Gold Medal Award For AcneStar®!

Over 100 exhibitors including inventors, manufacturers, investors and buyers attended the show at the prestigious Alexandra Palace in London on Saturday 23 October 2004, where over 200 inventions were shown. All inventions exhibited at the show were eligible to be judged by a panel of leading experts in the field of industry and invention. AcneStar® was represented at the show by the Welsh Development Agency. Much to Dermastar Ltd delight, AcneStar® was awarded a **Gold medal** in the "Invention of the Year Consumer Category". The Award was collected on Dermastar's behalf by Anne Swift, Project Co-ordinator with the WDA.

Silver Medal Award For AcneStar®!

The Wales Innovators Net-

work took 13 members and their ideas to the 32nd International Exhibition of Inventions, New Techniques and Products in Geneva in April 2004. Dermastar Ltd was awarded a Silver Medal for their new portable, hand held device for the treatment of acne - AcneStar®

There's More !!

AcneStar® has been awarded the class 2a approval from the MHRA. The tests were carried out by SGS Ltd who are a notified body. The tests basically find the product to be both electronically and optically safe; complying to all of the EU regulations.

AcneStar® Inspiration!

The inspiration for AcneStar is Professor Harryono Judodihardjo (Harry for short). Harry is a prominent Cosmetic Dermatologist and Laser Treatment Specialist. He is highly recognized in his field and is renowned for innovation in the skincare market. Harry and his team work very closely in an or-

within Dermastar which brings together different elements of expertise into the creation of each product innovation. Uniquely, Dermastar combines both the medical and engineering disciplines which allows Dermastar to explore and innovate within the neglected areas of the skin care market.
